Due to the massive fluctuation with the American Dollar and the Euro, these prices will change without notice.

Prices in this list are correct on day of publication but will change without notice. E & OE.

ABOUT SCOTS PINE ARROW SHAFTS. *Pinus Sylvestris*

Also known as *Silver Fir and Norway Pine*

Chris Boyton, of Boyton Archery, started making Scots Pine arrow shafts about seventeen or so years ago, when we could not get Port Orford Cedar from America. The Cedar, *Chemyceparis Lawsoniana*, had been felled at such rate that, to save bird and animal species, as well as the forest itself, felling was stopped. For months we could not get arrow shafts from America, until eventually a license was granted to the lumber companies to bring out only deadfall.

Because of the problems we were having with arrow shafting, Chris decided to have a go at making shafts in the quantities needed to supply both the English market and also an outlet in America! After experimenting with several woods, Chris found that Scots Pine, grown in the cold northern countries of Scandinavia was the most ecological wood available in the quantities needed. Although other woods were as good, if not better, than pine, there were problems getting enough that was planted as fast as it was harvested.

When Chris made his first batch of shafts I bought the lot. Amazingly, the spine ratio to numbers of shafts was perfect. Most were 40-45 5/16", at the time the most popular of all the sizes. I think I bought three or four thousand that first time, and after piling them into my van we took a photo of them, Chris's very first commercial batch of shafts, just for luck. The great thing was that there was a complete range of 5/16" and 11/32". The 23/64" came along a little while after and the most popular size of all for me 9/32" and then 1/4". With a lot of archers now realizing you don't need to 'kill' yourself with great heavy bows, the small diameter shafts are very popular.

Chris built all his own machinery, and designed and had made what he could not make himself.
The end result is the excellent shafts you see today.

THE BACK PAGE

OPENING TIMES

Before visiting, please phone for information on opening times.
01932 865181 or 07957 276892

Normal opening hours are most weekdays 2pm to 6/7pm plus some Saturdays. I can sometimes be open in the morning – please phone to arrange.

The kettle is always on, but please bring your own biscuits – no nutty ones thanks! (Or Hob Nobs-I'm s***k of them)!!

ARROW MATCHING

For matching arrows to you and your bow, I have a large selection of spined arrows, which you can try out on my 20yard outdoor range.

I am quite happy for you to bring any make of Longbow, Flatbow, recurve or Primitive bow to take advantage of this service.

However, Please Note: I charge £12 for this service unless you are purchasing a bow from me. If you need tuition please see below.

RANGE HIRE: You may use the range for £2.00 per hour per person (max. 3 people) for practice. You may hire a bow and arrows for £5.00 per hour per person (max 3 people). Please book/phone in advance, in case I am teaching.
Wooden arrows only. **NO bodkins or broadheads**

LONGBOW, AND TRADITIONAL BOW, LESSONS AND TUITION.

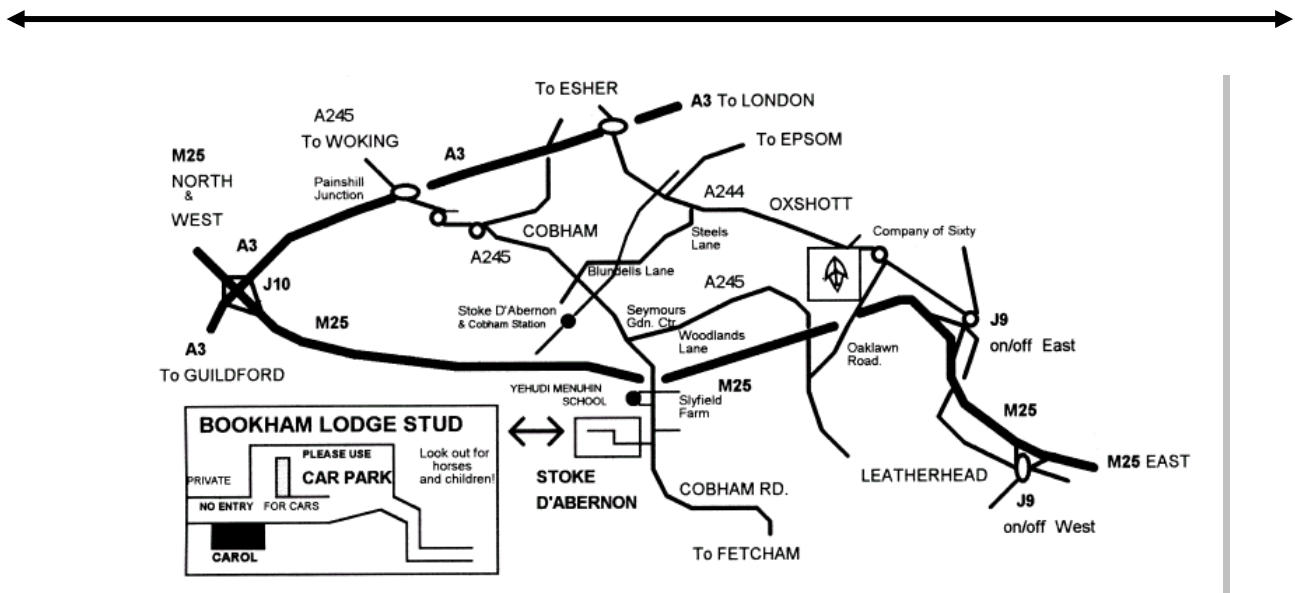

Going through a 'sticky patch'? (We've all been there)! Why not have an hour of tuition and lose those bad habits!

One to one £35.00 per hour

Two to one £50.00 per hour

You may bring your own bow for tuition.

If you are a beginner, I will supply all you need. It is NOT necessary to buy a bow for your lesson.

WHERE TO FIND ME:

NB. There is an automatic gate at the beginning of the drive. It is quite slow so be patient.

ARROW MATCHING

It isn't possible to buy a bow and expect untried arrows to suit how you shoot. It is far better to try many different combinations to see which suit YOU.

Buying arrows from the 'web', however pretty they may look, cannot guarantee they will shoot properly, or safely. Far better to take the time to come and have your arrows matched, to how you shoot, here at my workshop.

At least you won't go home with arrows that don't shoot properly/straight! And you can see how it's done! Although I am quite happy to make arrows for you, do *please* make your own. (I'll show you how). I've been making them for thirty years, and it can get a bit, sort of, tedious!!!

(See above for costs of lessons and arrow matching)
